

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of the claims in the application:

Listing of Claims:

1-4. (Deleted)

5. (Previously Presented) A device useful as a barbeque pit, comprising:

an enclosure having an upper end and a lower end, said upper end having an open section and said lower end having an open section;

a grill removably mounted within said opening of said upper section of said enclosure, said grill for cooking food thereon;

a firebox for containing therein a consumable fuel source that provides a source of heat for cooking food placed on said grill, said firebox comprising a watertight, unitary structure for holding water therein while said pit is in use, said firebox being an independent structure from said enclosure that includes a pair of opposed rails attached within said firebox and a removable fuel grate that is supported by said opposed rails, wherein said firebox is temporarily positioned inside said open section of said lower end of said enclosure during use of said pit and includes a means for expeditiously removing said firebox from said enclosure during and after use of said pit, wherein said means for expeditious disassociating said firebox includes support wheels and a handle and wherein water contained within the firebox during use of said pit will generate steam within the firebox to assist cooking food placed on the grill.

8. (Deleted)

9. (Currently Amended) The device of claim 5 [1], wherein said upper end of said enclosure further includes a pair of sliding doors for enclosing the open section.
10. (Deleted)
11. (Newly Added) A device useful as a barbeque pit, comprising:
- an enclosure having an upper end and a lower end, said upper end having an open section and said lower end having an open section;
 - a grill removably mounted within said opening of said upper section of said enclosure, said grill for cooking food thereon;
 - a firebox having a removable grate disposed therein for containing a consumable fuel source that provides a source of heat for cooking food placed on said grill, said firebox being a unitary, independent structure from said enclosure that is watertight and holds water therein while said pit is in use so as to assist in cooking food placed on said grill, wherein said firebox includes a means for expeditiously disassociating said firebox from said enclosure during and after use of said pit.
